

WRIGHT AT HOME

Looking for educational activities to do at home with the kids?
You don't need many materials to exercise your creativity!

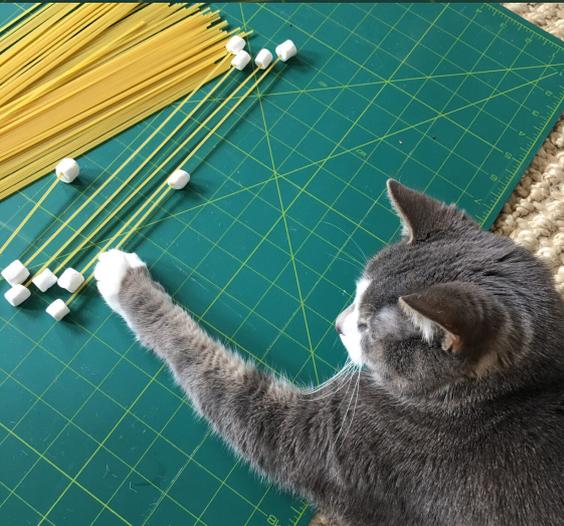

Explore your engineering skills as you use spaghetti and marshmallows to design and build a sturdy structure.

(Bonus points if you can build a cantilever!)

Grapes, modeling clay and toothpicks can be used as alternative materials.

Show us your design and share a cool tip you have for your fellow structural engineers by tagging **@flwtrust** and **#WrightatHome!**
