

# WRIGHT AT HOME

Build a Frank Lloyd Wright-inspired feeder for the birds in your garden! With just cardboard, peanut butter, bird seed, and twine, you can design and create an architectural bird feeder. Here's how:

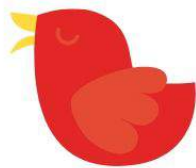

- Use recycled cardboard and adhesive (we used tape) to build a small architectural model

(We were inspired by Wright's Heurtley House.)

- Attach twine for hanging
- Cover model with peanut butter and bird seed.

Hang outside for the birds to enjoy!
